To whom it may concern,

This is to advise that Williams and Burns Contracting was the mechanical installation contractor Fulham Correction Centre New and Existing Building Refurbishment Project.

The total mechanical services contract value for this project was \$4.1 Million + SGT and as now just recently been successfully completed. The project is currently within its defect's liability period.

Correctional Infrastructure projects such as this carry unique challenges within complex layers of project oversight and management within delivery. Our experience with Williams and Burns was that they always operated in a professional manner, were active to engage and work with the consulting team in resolving construction delivery issues as they arose and kept to our program of works. The mechanical systems carried negligible defects which is a credit to their management structure, the project team and how they executed the works.

We at Ireland Brown have no hesitation is recommending this mechanical contractor to any builder and we look forward to working with them on future projects.

Please contact me if you wish to discuss this further.

Yours Faithfully.
